

Ubuntu Deployment SOP (Cisco Canvas LMS)

Target URL: ciscocanvas.chuka.ac.ke | Admin Email: cisco@chuka.ac.ke

1. Primary Network Identity

- **LMS Subdomain:** ciscocanvas.chuka.ac.ke (Points to Server IP)
- **Main Website:** cisco.chuka.ac.ke (Will redirect to LMS)
- **Institutional Email:** cisco@chuka.ac.ke

2. Server Environment Setup

Ensure files are at /home/ubuntu/lms and run the automated setup:

```
cd /home/ubuntu/lms/deployment_ubuntu
bash setup.sh
```

3. Nginx Reverse Proxy (DNS Mapping)

Deploy the Nginx configuration to map the reserved IP to the LMS domain:

```
sudo cp lms.nginx /etc/nginx/sites-available/lms
sudo ln -s /etc/nginx/sites-available/lms /etc/nginx/sites-enabled
sudo nginx -t && sudo systemctl restart nginx
```

4. Essential Production Adjustments

Before going live, verify lms/lms/config/settings.py has these values:

```
DEBUG = False
ALLOWED_HOSTS = ["ciscocanvas.chuka.ac.ke", "RESERVED_IP"]
CSRF_TRUSTED_ORIGINS = ["https://ciscocanvas.chuka.ac.ke"]
```

5. SSL Security (Let's Encrypt)

Apply SSL specifically to the subdomain:

```
sudo certbot --nginx -d ciscocanvas.chuka.ac.ke
```
